

[WuXi NextCODE and Olink Proteomics announce strategic cooperation](#)

Olink Proteomics - Jul 08, 2020 07:00 EDT

July 8, 2020: UPPSALA, Sweden (myNewsdesk), and SHANGHAI, China, (GLOBE NEWSWIRE)

The "new" era of high-throughput multi-omics, when proteomics meets genomics

With this new and important collaboration, customers in China will have access to run Olink fee for service projects in a similar way that customers have in other parts of the world. It will also mean that WuXi NextCODE will further improve their capability for high-throughput multi-omics research, based on genomics, transcriptomics and proteomics.

"For many years we have had requests from Chinese customers in pharma and academia to use Olink technology in their research. Early indications point to a strong local demand and we very much look forward to taking on this opportunity together with WuXi NextCODE", said **Jon Heimer**, CEO of Olink.

Lele Sun, Ph.D. General Manager of WuXi NextCODE said, *"We are pleased to become the strategic partner of Olink on the China market to promote Olink technology for detection of actionable protein biomarkers. With that, WuXi NextCODE enters into a new era of providing multi-omics services to its customers, combining its genomics capability with Olink proteomics technology, to serve customers with comprehensive solutions for precision medicine."*

About WuXi NextCODE

WuXi NextCODE is an integrated global life sciences informatics company, providing human genomics related research and services. WuXi NextCODE has the first laboratory in China (including Hong Kong, Macao and Taiwan) that has both CLIA/CAP certifications from the United States and ISO15189 certifications from the International Standardization Organization. As an integrated platform for genomic research and big data application, it supports cloud and offline use.

With offices in Shanghai, Beijing and other cities in China, we serve the leading population genomics, precision medicine, diagnostics and wellness initiatives and enterprises using the genome to improve human health around the world. Our capabilities span study design, sequencing, secondary analysis, storage, interpretation, scalable analytics, and AI and deep learning – all backed by the most proven and widely used technology for organizing, mining and sharing genome sequence data.

WuXi NextCODE has completed legal and financial separation with the restructured company, Genuity Science.

About Olink Proteomics

Olink offers an unmatched high-multiplex technique to identify actionable biomarkers, with a strong focus on the human plasma proteome. Using minimal sample volume we provide quantifiable results with high-throughput, exceptional sensitivity and specificity, with coverage across a broad dynamic range. Our mission is to accelerate proteomics together with the scientific community across multiple disease areas to enable new discoveries and better understand complex real-time human biology. We are committed to develop our offering and are continuously expanding our protein coverage for a growing number of biological processes and pathways.

Olink is well-established in Europe (HQ Uppsala, Sweden) and the USA (HQ Boston, MA), with a rapidly developing presence across Asia. We also work with a growing number of core labs around the world offering analysis and support to an expanding global customer base.
